WILKESBARRE, Jan. 29 .- The men and mules employed in the working part of the Delaware and Hudson Company's collieries were forced out this morning by a rapid ac-cumulation of gas which is being driven from the sunken portion of the mines. It has been found impossible to go into that part of the colliery which has settled, and the volunteer exploring parties have been the outlook for the future. Parties interviewed this morning say that the earth has settled as far as it will, and that the only danger is that which may arise from the danger is that which may arise from the sinking of the surface when the froat is out of the ground. Many men are at work repairing and propping up their houses, which were broken up by the first shock. The general belief is that the earth over the mines has become too compact to allow the escape of gas in any dangerous quantity. In some cases it creeps into close cellars in sufficient volume to cause an explosion if a lighted lamp is carried below. The brick buildings in the ward are the ones to be watched and feared, as their destruction would be almost certain to follow if the ground beneath them should give way even for a foot or two. Frame houses have been known to topple half way over without injuring any of the occupants.

#### TRAGEDY IN A BOX CAR.

Patal Pight Between Brakemen while the Truin was Thundering Along.

WYTHEVILLE, Va., Jan. 29.—A few days ago the wives of Sam Banks and Tom Irvine. rolled. When their husbands returned home they were informed by their wives of the quarrel. Last night the two men went on duty on a freight train, and when it was well under way they went into a box car to get warm. Each spoke disparagingly of the wife of the other and they fell to blows, and then clinched. At this point the whistle for down brakes was blown, but they did not hear it, and the train went thundering down a grade. At length Irvine got his hand to his bolt, drew a revolver and fired. The ball struck Banks above the left nipple. As he fell, mortally wounded, the shriek of the locomotive whistles for down brakes was again heard, and the train rushed on with terrific speed down the heavy grade. Banks cried out: Look out for the brakes. Tryine ran up the ladder, put on the brakes, and stopped the train just in time to save it from destruction. When the conductor entered the box car he found Banks dying. He lived only a few minutes thereafter. spoke disparagingly of the wife of the other and

SUNDAY ALARM BELL IN ITHACA. theriff Summoning a Posse to Protect

ITHACA, Jan. 29.—At 8 A. M. yesterday an irm was sounded on the Town Hall bell, which brought out the Fire Department and hundreds of citizens. It n learned that the bell had been rung by order of Sheriff Fallett, who had been summoned by Station Agent Merrill of the Utics, Ithaca and Elmira Railroad. They found a Mr. Serat with a force of men engaged in destroying and removing to an adjoining field, owned by P. C. Cornell, trestlework and a coal office belonging to the railroad company. At the order of the Sheriff Mr. Serat directed his men to stop work. The Sheriff and posses then withdrew.

Mr. Serat claims to have owned the trestlework and office intil a few days ago, when he sold the property to John Mitchell, a farmer, living near the depot. The railroad company claim that the property is theirs, and that Mr. Serat, being only an agent, had no right to sell it.

A number of Mr. Serat s workmen were last night armed on the property of the provisions of the new day for cutting feer rubber the provisions of table on the main track. No further trouble a anticipated. The ownership of the property is now to be contested in the courts.

#### CHINA'S ATTITUDE TOWARD JAPAN. Ill Feeling Growing Out of the Unsettled Los

Hong Kono, Jan. 4.-The attitude of China oward Japan is becoming unpleasant, if not actually ostile, the cause of iil feeling being the still unsettled so Choo question. The Chinese officials profess great adignation because the new Envoy from Japan comes indignation because the new Envoy from Japan comes without instructions to reopen the subject on his side, and several petty affronts have been given Japanese officials now in China. The Japanese Envoy is understood to declare that his predecessor had full powers to settle the dispute; that China agreed more than once upon terms of adjustment, only to repudiate her own action afterward, throwing such obstacles in the way of a reasonable agreement that Japan was compelled to withdraw from the negotiation. This was not done, however, until after the utmost patience and consideration had been shown in the endeavor to effect a proper understanding. Now Japan waits for China to reopen proceedings if she desires to. The Chinase officials virtually admit the correctness of these assertions, but assume that Japan, being a vounger and a small empire, is bound to consult the convenience of her continental neighbor. Foreign diplomatists have no fear that serious consequences will follow China's offensive action.

From Envoy tentioner will in an uncertain state. The Prench Envoy tentioner will in an uncertain state of the possession. Others assume that the troops will retire a short distance only, with the intent to take such action as future developments may render expedient.

That she Stowed Away in Trunks and E-teemed Only for their Beauty.

Kate Jacoby, a servant girl, was arraigned at Yorkville Police Court yesterday, charged with the theft of property worth several hundred dollars from people by whom she had been employed. The principal complainant was Mrs. Adelaide Ballin King, wife of David J. Ki.— Broad street banker, living at 541 Madison avenue. The young woman had been employed in Mrs. King's family for eleven months. During the Illness of Mrs. King on one occasion several nurses were employed, and silks, laces, embroidered skirts feathers, embroidered handkerchiefs, a pair of bracelets, silver toiletornaments, and table ware were missed. The servant was not suspected, and remained with Mrs. King until the latter departed for Kurope. A few days since Frederick Josephs of Xill East Fifty-first street, in whose family hate was employed, suspected that she had taken certain articles which were missing, and, procuring a search warrant, found them in her trunk. The articles were chiefly of underwear, and were of small value. Detectives Netwown and Cour of the action of the Articles were chiefly of underwear, and were of small value. By Wire Ladders from the Windows. Two wire-rope ladders were let down from fifth story window of the Leiand Hotel yesterday after noon, and a number of workmen began descending by noon, and a number of workinen began descending by them. The ladders were a new fire escape which has been adopted by the hotel. They are made of 7-32 inch wire cable, with 5 inch gas pipe rungs and wrought steel hooks, wherewith to fasten them to a window sill. A ladder 50 feet long, wound on a reel, is only 15 inches in diameter, weights about 40 pounds, and can be kept in corner of a room. The wire has been tested with a ion weight. The workinen in the hotel, who were unexpectedly called to ascend and descend the ladders, were a little nervous about it, but made the descent in 40 seconds.

Two citizens found Policeman Robert Esch of the Morrisania station lying on Thursday at 10 in the morning on a low pile of lumber in College avenue, near 138th street. His club lay on the ground, and his hat with the crown crushed in, was by his side. It was sup-posed that some young men with whom he had had trouble had beaten him. He died on Sunday without having recovered consciousness. A prolonged examina-tion of the body yesterday showed that he had received no hijury whatever, and that he had probably died of apoplexy. He was 58 years old and weighed 220 pounds.

EPPS'S COCOA

"By a thorough knowledge of the natural laws which govern the operations of digrestion and nutrition, and by a careful application of the fine properties of well-select Gooca. Mr. Epps has provided our breakfast tables with a delicately flavored heverage which may axve us many heavy doctors bills. It is by the judiclous use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency it disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a faint shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Clivil Service Gaactie.
